

JOSE A. GARCIA

Solutions Engineer | Enterprise Software Solutions

Boynton Beach, FL · garciabel212@gmail.com
linkedin.com/in/jose-abel-garcia · Portfolio

Customer-facing technical professional implementing enterprise workflow and document-management software in Windows and network-connected environments. Lead deployments from requirements gathering and configuration through testing, onboarding, training and go-live. Combine remote troubleshooting and ongoing technical support with experience integrating software and specialized hardware. Fluent in English and Spanish.

PROFESSIONAL EXPERIENCE

Service Engineer

Oct 2022 - Present

Digital Library Systems Group / Image Access | Boca Raton, FL

Company scope: 900+ institutions · ~\$7M in annual equipment and maintenance revenue.

- Lead onsite and remote implementations of enterprise workflow and document-management software, coordinating installation, configuration, system validation, go-live and post-sale support.
- Gather requirements with customer IT, procurement and operational stakeholders; assess workflows and network connectivity to configure integrated software and specialized hardware solutions.
- Install, configure and upgrade Windows-based applications; manage software versions, licensing and activation, and customer-specific settings.
- Diagnose application, operating system, network and software-to-hardware communication issues; coordinate technical escalations with engineering, support and customer IT teams.
- Deliver customer onboarding and user and administrator training; coordinate deployment logistics and follow-up, documenting customer activity, technical findings and service history in Salesforce CRM.
- Support Account Executives with solution demonstrations and technical presentations for customer leadership, IT teams and other stakeholders at meetings, conferences and trade shows.

CORE EXPERTISE

Software implementation · Requirements gathering · Application configuration and deployment
System testing and validation · Customer onboarding · User and administrator training
Go-live support · Remote diagnostics · Technical escalations · Solution demonstrations
Windows applications · Network troubleshooting · Software licensing · Salesforce CRM

ADDITIONAL EXPERIENCE

Network Operations Center Engineer

Nov 2021 - Sep 2022

Globenet | Boca Raton, FL

- Monitored enterprise networks, investigated connectivity incidents and performed root-cause analysis to support service restoration.
- Coordinated technical escalations and documented findings to support troubleshooting and incident resolution.

SELECTED PROJECT

Service Operations and Asset Management

Service Map Planner | Self-directed application using Next.js and Firebase

- Designed a centralized workflow application linking customer records, contacts, equipment and software assets, maintenance status and service history.
- Added map-based visit planning to organize customer locations and support service scheduling and travel preparation.
- Created maintenance-status views and data-quality checks to identify incomplete records and support customer follow-up.
- Designed relationships across customer sites, systems and components, with replacement workflows covering serial numbers, service status and shipping details.

TECHNICAL AND BUSINESS TOOLS

Applications and systems: Enterprise workflow and document-management software; Windows-based applications; network-connected systems; integrated software and hardware.

Deployment and support: Application installation and configuration; software licensing and activation; upgrades and version management; system testing; go-live support; remote diagnostics.

Customer operations: Salesforce CRM; requirements gathering; solution demonstrations; user and administrator training; technical escalations; customer documentation and service coordination.
